INFORMATION on some of the fields to fill in the form

Identical-competitor-rider

A function is created which, when the YES option is checked, copies the data displayed for the rider so that they do not have to be displayed again for the competitor. If NO is possible, the data must be hard-coded again and the copy function will be overwritten.

Championship - Cup

CEZ - Central European Zone - ticked by riders entering divisions that are announced in the zone

MČR - tick riders who ride in divisions announced only for the Championship - eg National 1600

MPRC - tick riders who ride divisions announced only in the Polish Championship

CEZ nebo MČR nebo ČTHA + RX CUP - tick the riders who would ride the given race or trophy plus they would also ride in the RX CUP

Divisions

In case of starting in more races, state the superior division - ie. from a higher level of championship. If someone wanted to go two divisions within the RX CUP, it would be solved operatively with the promoter of the series.

Depo length + Depo width + Depo exit

Specify the exact dimensions of your background, the position of teams in the area will be planned accordingly. There is no reservation system in Sosnová and with a larger number of teams, it is necessary to coordinate their location.

Depo note

State what your background consists of. The limit for buses and trucks should be 8 x 13 meters and for vans and motor homes with a basement then 8 x 6 - 8 meters. If the background is larger, it is possible to "hide" under two teams, but we need to know to prepare it in the depot.

Additional information to the application !!!!

Really read the questions carefully, your answers are very important for the organizers. They have a great influence on the organizational and financial side of the race. Since the organizer is not the owner of the circuit and he rents it for the race, everything must be planned in advance and there is not much space for improvisation.

THANK YOU FOR YOUR UNDERSTANDING
